picosep

Separating agent

Thin, silicone based isolating agent – specially developed for wax-dipping techniques.

Advantages

- Microfilm isolates plaster from wax or high-fusing porcelain.
- A thin layer is effective for days; no reapplication required.

Ordering information

picosep	30 ml (1.02 fl.oz.)	No. 15520030

Iso-Stift

Isolating stick

A practical, double-sided isolating stick for isolating plaster against porcelain and wax.

Advantages

- Soft and hard tip for individual applications.
- Economical and precise application of isolating material.
- Comfortable and easy handling.

Ordering information

Iso-Stift	1 piece, 4,5 ml (0.15 fl.oz.)	No. 17093000

Isofix 2000

Separating agent

Separation of plaster against plaster for production of working models.

Advantages

- Ideal separation characteristics thanks to soaking into plaster surface and sealing the open pores.
- Precise film-free separation of plaster components.
