Extraction units

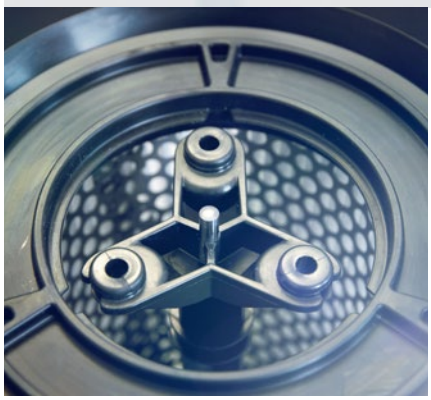

silent

compact

perfect view

This is what makes work easier

- extremely quiet
- strong suction power
- intuitive operation
- very long motor running time
- easy calibration
- modern, compact design

Combine cleanliness and quietness

Creating a conducive work environment is possible when the noise level is low and the fine dust level in the air has been greatly reduced. SILENT extraction units are therefore not only extremely powerful – with a suction capacity (depending on the version) up to a volume flow of 4000l/min. – but also surprisingly quiet, through implementation of the results gained from psycho-acoustic research.

Easy start, intuitive operation

Renfert extraction units can be very easily and quickly connected (Plug & Play), operated, cleaned and maintained. They provide the ideal filter technology for every requirement (with or without a bag depending on the version). The front of the unit allows convenient, direct access to all operating elements. All parameters can be very easily set using a membrane keypad or via a clear multifunctional display.

Select the perfect size

SILENT extraction units are available as single-workstation or two-workstation extraction units and also for use with a CAD-CAM system. All versions are compact and slimline.
